WHERE CUSTOMIZED SKILLS TRAINING MEETS PRIDE IN A JOB WELL DONE

MISSISSIPPI's skilled workforce is our greatest treasure. We have a “can-do” attitude and are driven by pride to do things right. Robust workforce training programs offered throughout the state equip Mississippi's people with the necessary skills to get the job done. A company is only as good as its people, and that's why more companies are choosing a Mississippi location to compete in today's global marketplace.

We have been at the heart of the nation's space program for decades, and Mississippi continues to attract premier companies in aviation and aerospace. Today, we are home to some of the world's most advanced aerospace manufacturing, like GE Aviation, ATK, Northrop Grumman, Airbus Helicopters, Rolls-Royce North America, Raytheon, Aerojet Rocketdyne, Lockheed Martin, General Atomics, L-3 Vertex and Zodiac Aerospace.

Toyota Motor Manufacturing in Blue Springs, Mississippi

MISSISSIPPI has produced more than 2 million vehicles in its first decade of automotive manufacturing. World-class automotive leaders like Nissan, Toyota and PACCAR are thriving here — with an inviting business climate and a centralized geographic location for both domestic and global sales. Nearly 200 automotive suppliers call Mississippi home, including the state's newest automotive partner and commercial tire giant Yokohama Tire Corporation.

A growing list of global companies have chosen to locate in Mississippi. Centrally positioned in the fastest growing region of the country, the state's location provides industries with a strong competitive advantage. We offer a ready, skilled workforce and one-stop environmental permitting. The state's robust infrastructure and available site inventory make Mississippi a prime location for today's companies searching for tomorrow's business solutions.

OUR TALENTED & SKILLED WORKFORCE BRINGS UNLIMITED POSSIBILITIES.

Chevron's Refinery in Pascagoula, Mississippi

MISSISSIPPI's innovative spirit is the driving force behind its biotechnology and life sciences pioneers. For 50 years, Mississippi has been at the forefront of healthcare research and development – from the United States' first lung transplant in 1963, performed by Dr. James Hardy, to the first synthetic organ transplant in 2011 made possible by Hybrid Plastic's POSS® nano chemical developed in Hattiesburg. Companies such as Baxter Healthcare, Cardinal Health, McKesson and Teleflex are thriving.

Mississippi already provides a friendly regulatory climate, a low cost of doing business and a well-developed network of natural gas pipelines across the state. Now, with significant tax incentives for new energy development and low-interest financing for infrastructure, Mississippi is harnessing energy's economic potential and maximizing growth opportunities for the next generation of producers. **Find out all Mississippi has to offer.
